

“The Fuuz MES Platform integrates machinery and sends real-time notifications to customizable plant floor dashboards for proactive maintenance and materials tracking. You will see ways to optimize business processes such as productivity increases, materials savings, and plant run times. Then, lean on the Fuuz team to ensure the platform and modules continue to evolve with your needs.”

MFGx & FUUZ | PLATFORM TOOLS

FUUZ® FROM MFGX

MES PLATFORM MODULES OVERVIEW

Say goodbye to siloed data, limited visibility into your operations, and dozens of costly third-party bolt-ons and hello to a simplified IT ecosystem that gives you complete control over your factory floor with the Fuuz MES Platform's modules.

FUUZ MODULES

WAREHOUSE MANAGEMENT SYSTEM (WMS)

Tracks real-time material availability to improve inventory management, achieve streamlined productivity, and ensure manufacturers can scale to their industry requirements across the warehouse.

ADVANCED PRODUCTION SCHEDULING (APS)

Supports discrete, process, and batch manufacturing scheduling to reduce changeover and lead times by intelligently setting up activities with compatible production runs.

QUALITY MANAGEMENT SYSTEM (QMS)

Captures real-time data entries made by equipment operators or the equipment itself to track and ensure quality control, inspection management, non-conformance tracking, corrective actions, and compliance with industry standards and regulations across all Fuuz modules.

COMPUTERIZED MAINTENANCE MANAGEMENT SYSTEM (CMMS)

Plans and intelligently schedules proactive preventative maintenance, minimizes downtime, and ensures the seamless operation of your factory floor with work order management, asset tracking, equipment performance monitoring, and predictive maintenance capabilities.

TRANSPORTATION SYSTEM MANAGEMENT (TMS)

Simplify how your logistics team builds loads, schedules inbound and outbound shipments, consolidates freight, and integrates with Third Party Logistics (3PLs), parcel shippers, and more.

PRODUCTION AND PROCESS MONITORING

Leverages advanced Machine Integration capabilities to provide comprehensive insights into manufacturing operations. By seamlessly integrating with diverse machinery and systems, these modules enable real-time data acquisition, analysis, and visualization, empowering users to monitor and optimize production processes efficiently.

FUUZ®
ignite innovation™

Fuuz® powered by MFGx is a next-generation Manufacturing Execution System (MES) platform with supportive processes that help companies of all sizes gain full visibility into their global operations, automate manual processes and accelerate their digital transformation – without the expense of new enterprise software.
